Government Digital Services Service Level Standard

Field	Value
Document ID	GDS-SLO-2026
Version	3.0
Status	Approved
Owner	Digital Government Office
Date	2026-01-12
Classification	Sample document, fictional content created to test docFactory

1. Service Level Objectives

Every government digital service that is classified tier 2 or higher must meet these service level objectives.

Objective	Definition	Target	Measurement window	Measurement source	Consequence of breach
Availability	Share of minutes in which the public entry point answers health probes successfully	99.5 percent	Calendar month	External uptime probe	Service review with the Digital Government Office
API latency	95th percentile response time of read requests	800 ms	Rolling 7 days	Gateway metrics	Performance remediation plan within 30 days
Error rate	Share of requests that return a server error	Below 1 percent	Calendar month	Gateway metrics	Post-incident review
Incident response	Time from a critical alert to acknowledgement	15 minutes	Per incident	Pager records	Escalation to the service owner
Recovery	Time to restore service after a loss of the primary site	4 hours	Per incident	Incident timeline	Disaster recovery review

2. Key Performance Indicators

KPI	Definition	Unit	Target	Current value	Frequency	Owner	Data source
Time to first match	Median time from registration to the first suggested vacancy	hours	24	31	Monthly	Product Owner	Platform analytics

KPI	Definition	Unit	Target	Current value	Frequency	Owner	Data source
Match acceptance rate	Share of suggested matches that the job seeker opens	percent	35	29	Monthly	Product Owner	Platform analytics
Employer response time	Median time for an employer to review a new application	days	3	4.5	Monthly	Employment Services Director	Platform analytics
Service desk satisfaction	Average rating of resolved tickets	score out of 5	4.2	4.0	Quarterly	Operations Manager	Ticket system survey
